DECEMBER, 2012

UPDATES

- Dr. Tonny
- 27 Acres
- Dairy Barn
- Building Crew

FUND RAISING...

With our matching donation up to \$125,000, we are working hard to raise funds. Praise God, we are almost through Phase II. If all the monies that have been committed come in, we'll have the full match!

Next, we'll begin raising funds for Phase III ... the processing plant and marketing phase.

Please send any gifts to Partners Worldwide, 6139 Tahoe Dr. SE, Grand Rapids, MI 49546.

Designate Gulu Country Dairy Project.

Dr. Tonny Kidega...

Dr. Tonny Kidega is a young Christian Ugandan Veterinarian. He worked in the big game parks of Uganda where he specialized in Chimpanzees. He then was hired by Heifer International to oversee their Dairy Cow Program. One of his duties was to train farmers how to care for their cows.

He has since visited the US and spent a month at Country Dairy in Michigan learning new and modern

ways of feeding and caring for dairy cows. Now, he's back in Gulu, Uganda to help construct and then

manage the new proposed Research Dairy facility.

**CURRENTLY**, Dr. Tonny is coordinating the clearing of the land, which should be happening any day. Also, he's researching and lining up the well drilling, along with the water tank that we estimate will have to be 16 to 20 feet high. There's much research and coordination to be done there, and we're so thankful to have Tonny as part of the team!

27 Acres

The 27 fertile acres outside Gulu, Uganda, is finally ours! All the paperwork is finally done.

Dairy Barn

Currently, we have ordered the barn materials from a company in Missouri. It will be shipped in January, then trucked to Uganda. We are so thankful for our Partners Worldwide employee, Timothy, and for Dr. Tonny, who are making this happen.

Building Crew

Starting on December 19, we are beginning talks to assemble a building crew. This is a very exciting adventure. Please pray for the crew to come together, and that they will receive funding to be able to participate!

**Thank you for your prayers and partnership! Please continue to pray.**

It's humbling to know that God is bringing others –you! –alongside our belief that this Research Dairy Farm has the potential to change lives in the rural areas of war-torn Northern Uganda.
